PROFILE

Second-year student of Multiplatform Application Development (DAM, Spanish Higher Vocational Diploma) and of a Master's in Data & Analytics. My main project is GestionAp PRO, a native iPhone app with its own Java and Spring Boot REST API and over 300 automated tests. I bring 6+ years of logistics operations experience in Spain and Australia, coordinating teams, routes and KPIs under pressure, and I apply the same habits to software: structure, focus on results and solving real problems. **Looking for an IT internship (Formación en Empresa) in development, data or tech consulting, with an interest in banking, in Madrid from February 2027**, with a view to staying on.

TECH STACK

Languages: Java, SQL, Python, Swift, JavaScript (Node.js), Kotlin
Frameworks: Spring Boot, Spring Security (JWT), Spring Data JPA, SwiftUI, JavaFX, Express, React (Vite)
Data: MySQL, MariaDB, PostgreSQL, MongoDB, JDBC, XML/XSD, data analysis
Testing and docs: JUnit 5, Mockito, MockMvc, Swagger (OpenAPI)
Tools: Git and GitHub, Maven, IntelliJ IDEA, VS Code, Android Studio, Postman, UML
Concepts: OOP, REST APIs, layered architecture, version control

PROJECTS

GestionAp PRO · App iPhone + API · Main project
SwiftUI · Java 21 · Spring Boot 3.5 · Spring Security · JWT · MariaDB | github.com/nelsongomezsa/gestionapro
- Native SwiftUI iPhone app to manage shared flats (contracts, payments and PDF receipts), with its own REST API with JWT login and roles (admin, owner, tenant).
- 220 API tests with JUnit 5 and MockMvc and 81 iOS tests, running in CI with GitHub Actions.
- It grew out of GestionAp, which started in my first year of DAM as a desktop app with JavaFX and MySQL (desktop version, 189 tests).

ChimiGO Urban Food · Live restaurant website
HTML · CSS · JavaScript · PWA | nelsongomezsa.github.io/portfolio-chimigo
- Website for a Dominican food spot in Madrid: menu with an order cart ready for WhatsApp, live opening hours, ES / EN and installable as a PWA. Lighthouse 100.

Finance Tracker API · Personal finance backend
Java 17 · Spring Boot 3 · JUnit 5 · Mockito · Swagger | github.com/nelsongomezsa/finance-tracker-api
- REST API for income and expenses with a monthly summary by category, input validation, centralised error handling and Swagger docs.

Master's in Data & Analytics projects: SQL queries (PostgreSQL), a NoSQL API (Express and MongoDB) and Python and JavaScript katas, at github.com/nelsongomezsa.
